

**PRITCHARD INDUSTRIES**

A BUILDING SERVICES COMPANY

# PRITCHARD PROTECT™

Clean. Safe. Essential.

# Pandemic Response

## A Holistic Approach to Safety

---

COVID-19 hit our nation and the world in ways we never could have imagined. During this challenging time, we developed programs to assure our employees and clients that we are committed to providing safety and peace of mind in our work environments and in the buildings that we clean.

With higher levels of cleaning required and requested, we have taken the opportunity to make available additional services. Built upon our traditional cleaning services, we offer **Pritchard Protect™** to include high touchpoint cleaning services, emergency supply stock, custom signage, special antimicrobial coating for an added layer of protection, and advanced disinfection and sanitation services when needed.

Providing service for over 35 years in the communities in which we live and work, we are committed to the health and well-being of all. We are your resource in your “**back to work strategy**”. We will work closely with you in conjunction with CDC guidelines to execute the best plan for you and your team. With that in mind we have developed our **Return-to-Work Program** that will guide our actions today and through the upcoming months – **Pritchard Protect™**.

---

### **Pritchard Protect™**

is our holistic approach to safety and is guided by 4 main areas:

- 1 ▶ **Menu of Services** ..... 3
- 2 ▶ **Branded Signage** ..... 4
- 3 ▶ **Certification and Training of Our Staff** ..... 5
- 4 ▶ **Appropriate Supplies and Equipment** ..... 5

<b>Electrostatic / Spray Disinfection</b>			✓	Range From <b>One Time to Quarterly</b>

### Antimicrobial Technology Preventative Coating Services

Surface protection is the most controllable way to prevent cross contamination and help reduce the spread of COVID, other viruses and bacteria that cause illness, and mold. In addition to regular cleaning and disinfecting services, we use a special Antimicrobial Coating that is a cutting edge Residual Nano-Technology protecting surfaces from microbial growth. The product we use is completely safe, approved by the EPA & CDC, and has undergone extensive laboratory efficacy testing with proven results. **You Can Keep Microbes From Coming Back with Antimicrobial Coating!**

#### Prevents Regrowth

Micro-Biostatic Antimicrobial Coating inhibits and prevents microbes re-growth after remediation.

#### Prevents Spread

Highly effective as a final step in the remediation process or as a proactive approach to prevent microbe spread.

#### Versatile Application

Can be applied in a variety of methods: Pump Sprayers, Electric Sprayers/Foggers, Electrostatic Sprayers or wipe on.

#### EPA Approved

EPA registered and approved for both porous and non-porous surfaces.
